Nickel tip's gold plated

LISTED nickel hopeful Rusina Mining raised the nickel resource estimate for its two properties in the Philippines by 163 per cent.

Rusina released the revised figures after completing the nickel limonite and saprolite resource estimation for the Acoje Project and a nickel laterite resource for the Zambales Chromite Mining Corporation project, near each other on the west coast of Luzon, 250km north of Manila.

The combined estimate includes 72 million tonnes grading 1.15 per cent nickel for 830,000 tonnes of contained nickel.
